Surveillance Express™ Edition
For Rapid, Out-Of-The-Box System Visibility

*Database Performance Monitoring Toolset*

Key Benefits

- *Quick and easy deployment that increases business/IT agility and lowers the total cost of ownership*

- *An affordable subset of our best-in-class monitoring that provides proven database support across SAP ASE, IQ, RS, SQL Server and Oracle*

- *Add-on options available for an additional charge: Data Flashback, Time Slicing and Advanced Reporting*

- *Easily upgrade to the full enterprise Surveillance version by activating restricted features*

Overview

The **Surveillance Express Edition** is a streamlined version of our robust enterprise toolset that delivers out-of-the-box monitoring capabilities for small, mid-range and enterprise operations. Surveillance Express provides all of the standard capabilities: real-time monitoring, event management with alarming and alerting and SQL analysis to monitor your most critical metrics, and provides ultra fast installation for immediate database system visibility.

Surveillance Express specifications:

- Limited to a single server (up to 8 cores)
- Monitor 20+ of the most critical high-level metrics Including CPU, disk I/O, memory, cache, and space usage
- See current running SQL, with plans
- Alerts dashboard (green/yellow/red) checking on the most critical high-level metrics and long-running SQL
- Web client access for many users
- Fast installation... Configure a database connection to begin monitoring immediately
